TECHNOLOGY CAPABILTY EVALUATION

Objectives - What We Do

1. Evaluate and understand your organization's current technology position and capabilities.
2. Create high-level technology framework and roadmap for delivery.
3. Determine suitable vendors aligned to service, governance, risk and growth ability.

Scope - How We Do It

1. Review, research and analysis your organization's existing technology capabilities and vendor agreements;
2. Consider and compare digital advancement suitable for your organization;
3. Identify key components, structures and service levels that are best suited to meet your technology needs;
4. Workshop with your organization's senior management to recommend key strategic priorities;
5. Develop a technology ecosystem framework and roadmap to meet these strategic priorities, including:
   a. User experience, operational process, business model.
   b. Guiding principles and standards.
   c. Reccomendations on potential vendors.
